OTHERS:

All materials used meet the requirements of the DGM according to RAL GZ 430.
 The distribution of the stitching may vary for fabric, leather and synthetic leather processing.
 With loose seat and back cushions, an impression of the cushion chamber divisions may be visible (especially with leather covers), this is typical of the product and is a deliberate feature of the design.
 The appearance of the stitching may vary depending on the fabric, leather and artificial leather used.

armrests FLY

Especially light upholstery is distinguished by its highly soft surface. In new condition, the covers exhibit a pronounced wave pattern purposefully based on the design and structure. The upholstery will adjust to the shape of the body and the firmness of the seat will give a little bit. Minor differences in seat firmness with add-on units are design-based and are therefore not a cause for complaint.

Suites are standardly delivered with the back covered in the chosen fabric. All material-related information can be found on the back refer to our of the individual fabrics and leathers in our fabric and leather samplers.

All dimensions stated in the price list are approximate dimensions in centimetres. We reserve the right to make changes in shape, colour and design within the scope of technical progress. Please always order from left to right as standing in front of the suite.
